Spill containment berms are designed for tough, reliable durability. The EPA's compliance efforts have increased as have the fines. Needless to say, environmental safety is at the forefront of almost every construction project today. **Spill berms** provide the flexible containment that's needed whether you are performing fuel transfers or the wash down of equipment. AIRE Industrial's containment berm systems, for oil spill containment or hazmat spill containment, are the best way to get your project started safely. Many berm options are available. Do you need drive through capability or extra ground protection? Aire industrial can provide you with a vast array of custom berm designs in addition to our in-stock-ready-to-ship inventory of skillfully manufactured, tough as tundra berm lines.

**Portable berms** can be taken to any jobsite and set up quickly. With this in mind AIRE Industrial's team of highly skilled engineers incorporated customer feedback into our durable, strong and easy to use containment berms. These features include our easy to use Quick Snap Stay system, skirtless design and use of XR-5 fabric which is provided by Seaman Corp, the gold standard of the safety fabric industry. Our spill containment berms are found around the world, so rest assured they can withstand the temperatures of the Arctic's frozen plains and the sweltering heat of the Middle East.

**We do not believe in planned obsolescence.** This is why we build tough, high quality **secondary containment berms** that are meant to last. One of our main goals is to keep you, our customer, in SPCC compliance and safe year after year. Spill prevention and spill protection are the industry watchwords in compliance today. AIRE Industrial provides the most comprehensive line of both spill prevention and spill protection supplies and products available for government and industrial buyers.

Portable containment is our business and we are committed to your safety. We deliver solutions that can save you money and time. Call our field-tested experts today at **800-247-3846** or **208-514-4040** to discuss your project's compliance needs, our in-stock, instantly available spill containment berm products, as well as a custom, built to your specifications, compliance solution. If an emergency arises, AIRE Industrial is prepared with our on-hand Spill containment berms or other Spill containment products that can ship the same day.

Click on the secondary spill containment berms and drip pad products for complete information.
